

COSTA
HANDLES

The Company

Costa Handles, on the strength of its thirty years' experience in the sector of handles, knobs and handles in phenolic and thermoplastic resins, presents its catalogue with all the passion that has always characterised its production, to offer the entire market a range of products capable of spanning the infinite universe of taste, from standard lines to the most elegant and refined design.

The high level of quality achieved thanks to the constant search for innovation and cutting-edge production techniques, today make this brand highly competitive on an Italian and international level, both in terms of quality and the breadth of the catalogue of proposals.

It is a success that is embodied in the very nature of our way of doing business, with constant attention to the needs of our customers, in order to offer the highest possible degree of satisfaction. True design combines form and function; when you add to this formula a passion for technological research, quality and materials, the result can only speak the language of excellence.
